YOUR JOURNEY STARTS HERE!

At CIT, we empower ambitious minds to become tomorrow's leaders and innovators. With 15 years of academic excellence and innovation, we combine strong academic foundations with real-world learning to prepare students for success in a rapidly evolving business and technological world. Undertaking a Bachelor's or Master's degree at CIT is more than an academic decision, it is an investment in your future, opening doors to global opportunities and rewarding careers.

EXPERIENCE CIT

CIT is more than a university, it is a dynamic ecosystem of innovation, creativity, and collaboration. Our learning environment encourages critical thinking, independence, and continuous growth.

You will study alongside students from around the world and learn from internationally experienced professors. Through close links with industry, students gain practical exposure and develop confidence, skills, and mindset to make a real impact.

Modern learning spaces and an inclusive campus culture create a community where students thrive academically, socially, and professionally.

LIFE AT CIT

A COMMUNITY THAT FEELS LIKE HOME

Campus life at CIT is designed to inspire. Beyond lectures and exams, students engage in clubs, competitions, conferences, and networking activities that support personal growth and lifelong connections. From technology and entrepreneurship to arts and sports, student clubs offer countless opportunities to explore interests, develop talents, and collaborate with like-minded peers.

A DIVERSE RANGE OF CLUBS TO JOIN

HACKATHONS

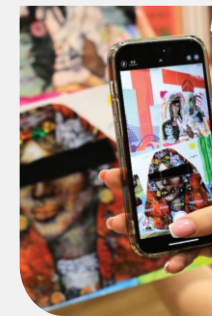

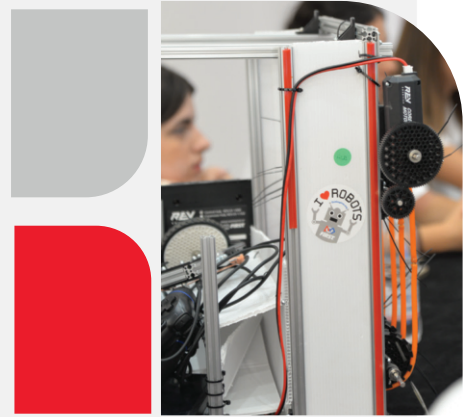

High-energy competitions where students apply their skills to real-world challenges, work in teams, and think under pressure, just like in the industry. Participants develop problem-solving abilities, gain hands-on experience with modern technologies, and showcase their talent in front of peers and professionals. Hackathons at CIT offer valuable networking opportunities, recognition, and exciting prizes that strengthen both confidence and CVs.

STUDENT CONFERENCES

A unique opportunity for students to present ideas and research, build public speaking confidence, and engage in meaningful academic discussions. Through interaction with professors and guest experts, students receive constructive feedback, develop critical thinking, and enhance communication skills, key competencies for postgraduate studies and professional careers.

STUDENT TRIPS

Students participate in numerous trips that combine learning, discovery, and networking. Student trips connect academic knowledge with real-world contexts, exposing participants to new cultures, industries, and professional environments. They strengthen teamwork, broaden perspectives, and create lasting memories that enrich both personal growth and career development.

OPEN YOUR DOOR
TO THE WORLD

PROFESSIONAL GROWTH

BUILD YOUR CAREER WHILE YOU STUDY

Students are empowered through innovative workshops, seminars, and professional activities that build real world skills, strengthen career confidence, and prepare them to succeed in competitive industries.

CAREER ADVICE & OPPORTUNITIES

CIT offers a broad range of support to enhance your future prospects. From the first year, they gain access to career coaching, CV and interview preparation, practical trainings, and real internship opportunities with partner companies. These experiences help students build work experience early and enter the job market with a clear advantage. Through regular open lectures, company visits, and networking events, students connect directly with employers and alumni working in the industry. Many internships lead to job offers, as companies value CIT students for their practical skills, professionalism, and readiness to perform from day one.

82% *Internship & Employment Rate*

INDUSTRY PARTNERS

YOUR GATEWAY TO A GLOBAL CAREER

INTEGRATED PROFESSIONAL CERTIFICATIONS

At CIT, professional certifications are embedded directly into the academic curriculum and delivered as part of regular semester courses.

Certification-aligned content from **Cisco**, **AWS**, **Oracle**, **EC-Council**, and **ACCA** is integrated into lectures, labs, and applied projects.

Students prepare for certification exams during their studies and complete the official assessments upon finishing the relevant courses. Across most study programs, students can earn 5+ internationally recognized professional certifications, graduating with both an accredited degree and credentials that strengthen their CV and career opportunities.

Foster strong foundations in networking and IT infrastructure, preparing for roles across enterprise networks, system administration, and network security.

Enhance practical cybersecurity skills in ethical hacking, digital forensics, and information security through hands-on, industry-recognized training.

Gain practical cloud computing experience and learn to build, manage, and secure modern digital services using industry-standard AWS tools.

Develop competencies in enterprise systems, cloud technologies, AI, and business applications through real-world, application-driven scenarios.

Build a solid foundation in accounting, finance, and audit aligned with international professional standards, supporting career pathways in finance and business.

Achieve hands-on, industry-aligned skills through practical training and internationally recognized certifications designed to enhance employability.

ENHANCE YOUR GLOBAL EXPERIENCE

CIT integrates international mobility directly into its study programs, enabling students to gain global academic and cultural experience as part of their degree. Through a wide network of **25+ partner universities**, students can participate in exchange semesters, short-term study programs, and international academic activities that strengthen their profile and broaden career opportunities.

WHY GO ON AN EXCHANGE?

ERASMUS+

Allows students to study abroad with full academic recognition, providing exposure to different academic environments while developing language proficiency and intercultural competence.

CEEPUS

Students access discipline-focused mobility within Central and Eastern Europe, benefiting from specialized courses, joint seminars, and academic collaboration aligned with their field of study.

CREDIT TRANSFER

Supports the seamless transfer of credits earned during international mobility periods, ensuring that study or work undertaken abroad contributes to the student's overall progress—no lost time, no repeated courses.
